

A photograph of a Northwestern Medicine building at night. The building's facade is dark, but the 'M Northwestern Medicine' logo is brightly lit in white. In the foreground, a white Chicago Fire Dept. ambulance with the number '11' and 'ADVANCED LIFE SUPPORT' is parked. The ambulance has red and blue emergency lights flashing. The scene is set on a wet street, with reflections of the lights visible. Trees and a street lamp are also visible.

8TH ANNUAL BROOKSTONE CONFERENCE

HUGHES AUDITORIUM
303 E. SUPERIOR STREET, CHICAGO, IL 60611
THURSDAY, OCTOBER 15TH, 2025
12:00–6:00 PM CT
JOIN US IN-PERSON OR VIRTUALLY

Rethinking Bipolar Disorder:

Brain Circuits, Neural Trajectories, and Emerging Treatments

Bipolar disorder remains one of the most disabling psychiatric conditions across the lifespan. Advances in neuroscience, imaging, cognition, and precision therapeutics are creating new opportunities for earlier identification and intervention. The 2026 Brookstone Conference will bring together leaders in the field to explore the future of bipolar disorder research and treatment.

2026 Keynote Speakers

KATHERINE BURDICK, PHD

Vice Chair of Research,
Vagelos College of Physicians and Surgeons,
Columbia University
New York State Psychiatric Institute

KERI MARTINOWICH, PHD

Chief Scientific Officer,
Lieber Institute for Brain Development
Johns Hopkins University School of
Medicine

MARY L. PHILLIPS, MD (CANTAB)

Distinguished Professor in Psychiatry
University of Pittsburgh

CONFERENCE AGENDA

12:00–12:30 PM

REGISTRATION & POSTER SESSION

12:30–4:30 PM

SPEAKER PRESENTATIONS

4:30–5:00 PM

ROUNDTABLE DISCUSSION

5:00–6:00 PM

RECEPTION & POSTER SESSION

Speakers Representing Northwestern

EVAN GOULDING, MD, PHD

Clinical Director,
Bipolar Center of Excellence
Northwestern Medicine
Dauten Behavioral Health Institute

SHAN SIDDIQI, MD

Scientific Director,
Bipolar Center of Excellence
Northwestern Medicine
Dauten Behavioral Health Institute

ROBIN NUSSLOCK, PHD

Director of Clinical Psychology & Training

CALL FOR POSTER ABSTRACTS

8TH ANNUAL BROOKSTONE CONFERENCE

Rethinking Bipolar Disorder: Brain Circuits, Neural Trajectories, and Emerging Treatments

The Northwestern University Feinberg School of Medicine Department of Psychiatry and Behavioral Sciences invites poster abstract submissions for the 8th Annual Brookstone Conference, taking place on October 15, 2026, in Chicago.

Abstracts addressing bipolar disorder and advances in neuroscience, cognition, affect, imaging, and precision therapeutics are welcome.

ABSTRACT REQUIREMENTS

- Maximum 250 words
- Include: Aims, Methods, Results, and Conclusion
- Do not include figures, tables, or references

SUBMISSION DEADLINE TUESDAY, SEPTEMBER 1, 2026

SUBMIT TO:
beth.bryngelson@northwestern.edu

SUBJECT LINE:
POSTER ABSTRACT BROOKSTONE 2026

Welcome Our New Faculty

Shan Siddiqi, MD
*Stephen M. Stahl Associate Professor
Scientific Director, Bipolar Center of Excellence*

Tiffany Cheng, MD
*Assistant Professor,
General Psychiatry*

Mohammad Lesanpezesghi, MD
Instructor, General Psychiatry

Jenny Zhang, MD, PhD, Featured at Beyond Crisis Mental Health Summit

Jenny Zhang, MD, PhD, board-certified attending psychiatrist at Northwestern Memorial Hospital and Co-Director of Northwestern Medicine's Recovery from Early Psychosis Program, will participate as a featured speaker at NAMI Chicago's Beyond Crisis Mental Health Summit.

Dr. Zhang joined the Early Intervention: First Episode Psychosis panel, which focused on the importance of timely, coordinated care for individuals experiencing psychosis. The discussion highlighted how early intervention, specialized care, and wraparound support services can improve recovery, quality of life, and long-term outcomes for patients and families.

Jenny (Yu) Zhang, MD, PhD
Assistant Professor, Psychiatry and Behavioral Sciences (General Psychiatry)

Jeffrey Rado, MD, MPH, Featured in Psychiatric News

Jeffrey Rado, MD, MPH, chaired a standing-room-only session at the American Psychiatric Association Annual Meeting in San Francisco titled "Antipsychotic Weight Gain in the Seriously Mentally Ill: Integrating GLP-1 Receptor Agonists Into Your Clinical Practice."

The session was later featured in the July issue of Psychiatric News. The topic grew from Dr. Rado's work in the department's Metabolic Clinic, where he combines GLP-1 and other anti-obesity medications with lifestyle counseling to help psychiatric patients address medication-related weight gain and other metabolic concerns.

Jeffrey Rado, MD, MPH
*Associate Professor, Psychiatry and Behavioral Sciences (General Psychiatry),
Medicine (General Internal Medicine)*

Help Shape Better Behavioral Health Care

The Dauten Behavioral Health Institute launches a Patient and Family Advisory Council for the Bipolar Disorder Center of Excellence

The PFAC is designed to be more than a feedback group. It is a collaborative space where advisors can help represent the broader needs of patients and families, offer constructive input, and support continued improvement across the center. Northwestern Medicine describes the PFAC as a vital connection between the institute and the patients it serves.

Who Can Participate?

Eligible advisors include patients who received psychiatric care at Northwestern Medicine for bipolar disorder within the past three years, as well as family members of patients who received this care during that same period. Members should be comfortable working in a group, able to think beyond their own experiences, and committed to improving care for all patients and families.

What Advisors Do

PFAC advisors help by:

- Sharing patient and family perspectives
- Providing feedback on services and resources
- Supporting quality and safety improvement
- Helping staff and leaders better understand the care experience
- Advocating for patient and family-centered care

Members are asked to attend a volunteer orientation, serve a two-year term, follow privacy requirements, and participate in bimonthly meetings.

How to Apply

Patients and family members interested in joining the PFAC can **complete the online intake form**. Selected participants will be contacted with next steps, including a short call with one of the PFAC sponsors.

Questions? Contact NMDBHI@nm.org

PPFC Expands Timely Access to Focused Behavioral Health Care

What Makes PPFC Different?

Integrated treatment

The PPFC team includes psychiatric APRNs **Laura Logan, Stacy Meyer, Kyle McKinley, and Mary Sandler**, along with psychotherapists **Brent Rappaport, PhD, and Kate Parsons, LCSW**. Together, they provide both medication management and brief psychotherapy services.

Open-access scheduling

Appointments are not booked more than one week in advance, improving flexibility and allowing patients to begin care quickly.

Focused, time-limited support

Patients receive targeted treatment for their immediate needs, with support transitioning to primary care or longer-term behavioral health services when appropriate.

PPFC at a Glance

Through June 2026:

- **304 patients served**
- **Median time to first appointment: fewer than five days**

What Patients Are Saying

“I appreciate being heard. The care I received today made me feel that someone wanted to help me while I’m struggling through a difficult time in my life.”

Another patient described receiving a response in less than 24 hours and being able to schedule an appointment quickly, noting that the intake process and timely access made them feel valued and supported. The Psychiatry Problem-Focused Clinic (PPFC) is helping patients access short-term behavioral health treatment without a prolonged wait. Designed for motivated patients with low-to-moderate acuity needs, the program provides up to 16 weeks of focused care, helping patients address immediate concerns while developing a longer-term treatment plan when needed.

By combining rapid access, coordinated treatment, and a clear path forward, the PPFC is expanding how Northwestern provides timely, patient-centered behavioral health care.

Fall 2026 Virtual Group Series

This fall, our Clinical Social Work team is offering three virtual groups designed to help patients strengthen relationships, manage caregiving stress, and improve sleep. Each program provides practical tools, structured support, and a space to connect with others facing similar challenges.

Interpersonal Effectiveness

This 8-week group uses DBT and mindfulness skills to help participants communicate their needs, set healthy boundaries, strengthen relationships, and maintain self-respect.

Wednesdays, 1–2 PM | September 23–November 11

Referrals: Jenna Levinson, LCSW

Caregiver Connections

This 11-week support group offers caregivers a space to share experiences, connect with others, and develop strategies for managing the emotional strain of caring for a loved one.

Wednesdays, 11 AM–12 PM | October 7–December 16

Referrals: Hannah Rosenfeld, LCSW

Sleep Improvement Strategies

This 6-week group will introduce CBT-based tools to help participants address sleep disturbances and improve sleep quality.

Beginning October 2026

Referrals: Charlinda Brashear, LCSW

For more information, please contact **Michelle Cestaro, LCSW.**

Left to right: Graduates Jeanne Oord, Benjamin Bowlby, Anne Nielsen, Leigh Berman, and Gayane Archer

Celebrating the Psychiatry Class of 2026

The Department of Psychiatry and Behavioral Sciences celebrated its graduating residents and recognized excellence in teaching during the Class of 2026 Commencement Ceremony.

Congratulations to Our Graduating Residents

Gayane Archer, MD
*Addiction Medicine Fellowship,
University of Arizona*

Leigh Berman, MD
*Consultation-Liaison Fellowship,
University of Washington*

Benjamin Bowlby, MD
*Neuropsychiatry Fellowship,
University of Illinois Chicago*

Anne Nielsen, MD
*Attending Psychiatrist,
Compass Health Center*

Jeanne Oord, MD
*Perinatal & Women's Mental Health Fellowship,
Northwestern*

Resident Teaching Awards

Congratulations to this year's Resident Teachers of the Year:

Chandrika Shankar, MD
PGY-1

Jaclyn Weisman, PhD
PGY-3

Kaitlyn Kunstman, MD
PGY-2

Juan Aparicio, MD
PGY-4

Psychiatry Clerkship Awards

Congratulations to this year's recipients of the Psychiatry Clerkship Awards:

Robert Sobut, MD
Faculty Teacher of the Year

Taylor Burchfield, MD
Resident Teacher of the Year

Welcome Our New Child & Adolescent Psychiatry Fellows

We are pleased to welcome the Child and Adolescent Psychiatry Fellowship Class of 2028 to Northwestern and Lurie Children's. This incoming class brings training experience from institutions across the country and will join our department's ongoing work in clinical care, education, and child and adolescent mental health.

Welcome to Northwestern!

Liz Babkin, MD
University of Minnesota

Mithcell Bayne, MD
SUNY Downstate

Hosain Ghassemi, MD
UCSF-Fresno

Mahima Ginjupalli, MD
UT San Antonio

Suraj Marwaha, MD
Rush University

Gaelle Rached, MD
Cleveland Clinic

Anu Zutshi, MD
University of Colorado

Lily Wang, MD
University of Virginia

Clinical Psychology PhD Students Mark a Standout Year

Our Clinical Psychology PhD students have had an impressive stretch of accomplishments, with recent dissertation defenses, national awards, peer-reviewed publications, research grants, and media features highlighting the strength of their work across clinical science, health psychology, neuropsychology, trauma-informed care, and behavioral medicine.

Among the highlights, **Linzy Pinkerton**, **Payton Solk**, **Andrea Haidar**, **Ollie Fegter**, and **Sam Battalio** successfully defended dissertations on topics ranging from parental functioning and breast cancer survivorship to culturally tailored mindfulness, primary progressive aphasia, and community-engaged research. Students also earned major recognition, including **Ada Moses** receiving the *Walter F. Burke Award for Excellence in Clinical Psychology*, **Sam Battalio** receiving the *George Yacorzynski Award for Dissertation Excellence*, **Morgann West** receiving the *2026 Society for Biopsychosocial Science and Medicine Scholar Award*, and **Julia Pincever** receiving the *Society of Behavioral Medicine's Karen Calfas Physical Activity Student Research Excellence Award*.

Their work is also reaching wider audiences. **Abigail Vogeley** was featured in coverage of her research on health literacy and medication instructions, noting that confusion around health care instructions is not simply a patient problem but a systems problem. As she put it, the goal is not to identify what patients cannot do, but to ask, "can we confuse patients less?" **Joe Kelly** was profiled in *Feinberg's Breakthroughs* newsletter for his work using intracranial EEG to study memory formation in the developing brain, including how the parietal cortex contributes to recognition memory in children and adolescents.

Together, these accomplishments reflect both the talent of our students and the mentorship of faculty supporting their growth as researchers, clinicians, and future leaders in psychology.

Linzy Pinkerton

Payton Solk

Andrea Haidar

Ollie Fegter

Sam Battalio

Ada Moses

Morgann West

Julia Pincever

Abigail Vogeley

Joe Kelly

Kakra Boye-Doe Receives AACAP Pilot Research Award

Kakra Boye-Doe, MD, a CAP2 fellow, received the competitive *American Academy of Child and Adolescent Psychiatry Pilot Research Award for Attention Disorders/Learning Deficits in Psychiatric Disorders*, supported by the Elaine Schlosser Lewis Fund.

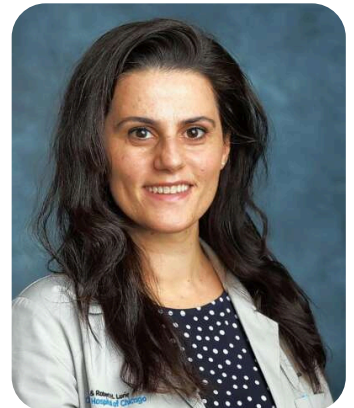

His project, *Demoralization as a Mechanism Linking Perceived Racial Discrimination to Suicidal Thoughts and Behaviors in Black Youth with ADHD*, examines an important intersection of discrimination, mental health, and suicide risk among young people with ADHD.

Alba Pergjika Earns Two Research Honors

Alba Pergjika, MD, MPH, was selected to attend the **American Foundation for Suicide Prevention Early Career Research Reapplication Lab**, a three-day invitational workshop at the organization's national office in New York City. With **Scott Compton, PhD** participating as a faculty mentor, the program provides intensive support in grant and study development while helping early-career researchers prepare for future AFSP funding opportunities.

Pergjika also received first prize at the annual vMed26 conference at UCLA for her poster, *AI to Predict ED Return Risk from Personalized Suicide Safety Plans*. Congratulations to Alba on these well-deserved achievements in suicide prevention research.

Welcoming the 2026–2027 Psychology Trainees

Lurie Children's Psychology Training Program welcomes its new doctoral interns and postdoctoral fellows for the 2026–2027 academic year.

Postdoctoral Fellows

- **George Abitante, PhD** — Vanderbilt University; internship at Rush University Medical Center
- **Patricia Garibaldi, PhD** — Northwestern University; internship at Brown University
- **Kyler Lehrbach, PhD** — Temple University; internship at Lurie Children's
- **Taylor Macaulay, PhD** — Rosalind Franklin University of Medicine and Science; internship at MetroHealth Medical Center

Doctoral Interns

- **Afiya Sajwani** — Northwestern University
- **Taylor Stevens** — Vanderbilt University
- **Maria Wilson** — University of Arizona

We are pleased to welcome this new class and look forward to their contributions to clinical care, research, and education.

New Psychology Leadership

Jackie Papadakis, PhD
*Clinical Practice Psychology Directors
for Embedded Pediatric Psychologists*

Bonnie Essner, PhD
*Clinical Practice Psychology Directors
for Embedded Pediatric Psychologists*

Claire Coyne, PhD
*Clinical Practice Psychology Director
for the Potocsnak Family Division
of Adolescent and Young Adult Medicine*

Tony Vesco, PhD
*Associate Director
of Training in Psychology*

Psychiatry Recognized During Lurie Children's Inaugural Research Discovery Week

Psychiatry faculty and fellows were well represented during **Lurie Children's inaugural Research Discovery Week**, a five-day celebration of scientific collaboration and innovation.

The **New Arrivals Wellness Team**, led by **Rebecca Ford-Paz, PhD**, and **Tareq Yaqub, MD**, received the **2026 Collaborative Impact Award** for demonstrating how interdisciplinary teamwork can advance discovery and meaningful change.

Pediatric intern **Maia Lee, MD**, received the **Health Disparities Research Award** and delivered a platform presentation on her work with **Andrea Spencer, MD**. Additional psychiatry faculty and fellows who presented or contributed to posters included **Claire Coyne, PhD**; **Diane Chen, PhD**; **Christy Ky, MD**; **Cecilia Hollenhorst, MD**; and **Alba Pergjika, MD, MPH**.

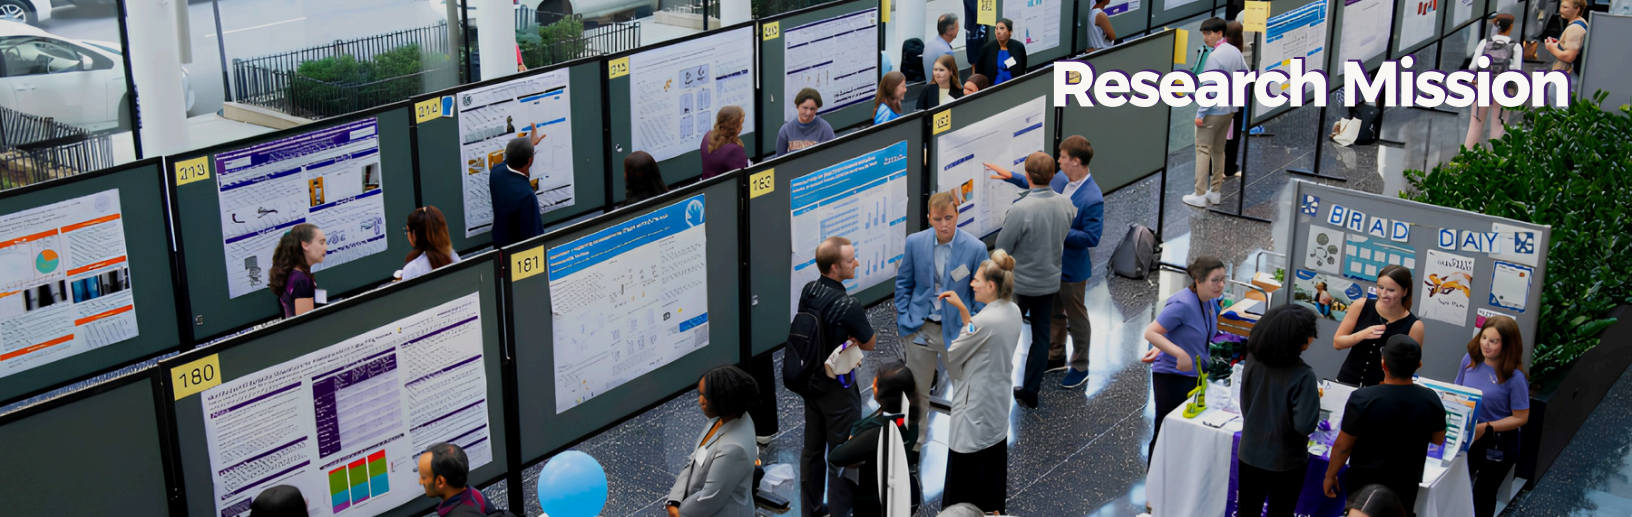

Child Psychiatry Faculty Represent Northwestern at the APA Annual Meeting

John Walkup, MD, **Aron Janssen, MD**, and **Andrea Spencer, MD**, represented Lurie Children's and Northwestern Child Psychiatry at the **American Psychiatric Association Annual Meeting**.

Their participation included the **Child and Adolescent Psychiatry Master Course** and the AACAP Presidential Symposium, *Innovation for Impact in Child and Adolescent Psychiatry*, highlighting Northwestern and Lurie Children's engagement in national conversations shaping the future of pediatric mental health care.

Research Mission

Feinberg Research Day 2026 Coming This September

Feinberg's 20th Annual Lewis Landsberg Research Day will take place on Thursday, September 10, 2026. This annual event brings together students, trainees, staff, and faculty to showcase research from across the medical school, connect with colleagues, and celebrate scientific discovery.

The day will feature poster presentations, a keynote lecture, research awards, and opportunities to engage with work being conducted throughout Feinberg. Department members are encouraged to attend and support colleagues participating in this year's event.

Clinical Trials Research Unit

Fall 2026

- 1) Open label study for xanomeline/trospium (Cobenfy) in the treatment of early phase schizophrenia.
 - Eligibility: Ages 18-40
 - For patients with insufficient response to treatment or intolerable side effects
- 2) Add-on **ALTO-100** (pro-neurogenesis agent) for bipolar depression.
 - Eligibility: 18-70, on a mood stabilizer(s) and/or an atypical antipsychotic with inadequate response, currently experiencing a depressive episode
 - Patients stay on current BD medications.
- 3) Double-blind study of **ITI-1284** (atypical antipsychotic, lumateperone) monotherapy for GAD patients who have had an inadequate response to current anti-anxiety therapy.
 - Eligibility: 18 yo+, with lifetime history of an inadequate response to at least 2 GAD approved treatments.

Lab Contact Information:

- **Director & PI:** Dr. Jeffrey Rado (Jeffrey.Rado@nm.org)
- **Research Coordinator:** Chaise Hauck (chaise.hauck@northwestern.edu, 312-503-9092)
- **Sub-investigators:** Dr. Jenny Zhang, Dr. Basar Cenik
